Corporate Overview:

Team EmERGE/TSV is a strategic collaboration between The Simple VUE and Emerge Solutions Group, both SBA 8(a) certified firms, dedicated to supporting the Defense Counterintelligence and Security Agency (DCSA) in its mission to safeguard national security. With deep expertise in technology, compliance, and operational excellence, we provide a comprehensive suite of management consulting, program management, risk mitigation, and data-driven solutions designed to meet the dynamic challenges of the national security environment.

We are committed to delivering measurable outcomes, enhancing DCSA's efforts to protect classified information, uphold the integrity of the cleared workforce, and deploy advanced solutions that address evolving national security threats with precision and efficiency.

Services:

Team EmERGE/TSV offers a strong portfolio of capabilities to support DCSA's mission. Together, we deliver a comprehensive suite of solutions designed to empower DCSA in addressing current and emerging national security challenges with agility and effectiveness.

PAST PERFORMANCE

Medical Expense and Performance Reporting System (MEPRS)

Resource & Personnel Integration, Cost Accounting Division, J8 Financial Operations at Defense Health Agency (DHA)

Our team oversees strategic planning, program management, quality surveillance, data analysis, and Electronic Health Record (EHR) workload assignment strategies. We ensure the development, implementation, and maintenance of MEPRS policies, procedures, and business practices, applying standardized, auditable rules for integrating and reporting healthcare workload data.

Project Type:

Program Management, Data Analysis

Value Creation:

A cutting-edge standardized method for comparing military medical services' costs, personnel utilization, and efficiency.

Digital Tools Against Inaccurate Health Information about Infectious Disease Treatments and Vaccines

National Institute of Allergy and Infectious Diseases (NIAID) at the National Institutes of Health (NIH)

Our team pioneers a cutting-edge inaccurate health information management platform for the NIH, using AI and ML. This empowers public health organizations to monitor, understand, and counteract inaccurate health information on social media proactively. Our technology enables effective engagement, ensuring accurate health information is widespread online.

Project Type:

Information Technology

Value Creation:

Implemented Artificial Intelligence to combat inaccurate health information

DoD HIV/AIDS Prevention Program (DHAPP) Support Services

Defense Health Agency (DHA)

Our team provided extensive program management and integration services to advance DHAPP's strategic objectives. We enhanced HIV/AIDS prevention through tailored educational materials for military personnel across DHAPP-affiliated countries. In addition, we evaluated new strategies and designed epidemiology database structures for analysis.

Project Type:

Program Management, Information Technology

Value Creation:

Assist foreign military partners with the development and implementation of HIV/AIDS prevention, care, and treatment programs.

Health Information Integrity Team Support

Office of Communications at the Centers for Disease Control and Prevention (CDC)

Combat inaccurate health information and ensure dissemination of credible, accurate, and clear health information.

Services Provided:

- Project Management
- Monitoring communication channels for inaccurate health information
- Data Analysis and reporting
- Development reports and actionable insights
- Training and capacity-building support

Project Type:

Information Technology, Data Analysis, Program Management,

Value Creation:

Combat inaccurate health information

Data Extract of Military Health System GENESIS Data

Resource & Personnel Integration, Cost Accounting Division, J8 Financial Operations at Defense Health Agency (DHA)

Our team provides implementation, maintenance, and sustainment of MHS GENESIS (DOD's Electronic Health Record) clinical workload documentation, staging environments, data mapping, and data extract file creation to upload the data into the MHS Expense Assignment System IV.

Project Type:

Program Management, Data Analysis

Value Creation:

Provided interactive data quality control metrics for Senior leadership visibility and data quality improvements.

Simulation Learning, Evaluation, Assessment, and Research Network (SimLEARN) -- Resuscitation Education and Innovation (REdi) program

Office of Healthcare, Innovation and Learning (OHIL) at Department of Veterans Affairs (VA)

Our team develops sustainable management and training solutions for VA, VHA, and DEAN, adapting to the rapidly changing institutional environment. We support the REdi program with administrative assistance, in-person and virtual training, and testing, evaluating, and enhancing the training system.

Project Type:

Enterprise transformation, healthcare innovation and modernization

Value Creation:

Implemented fully automated solution to reduce cost and increase efficiency
